

Reuban Raj Gunasegaran

Klang, Selangor | 011-11813747 | markreuban25@gmail.com | [LinkedIn](#)

CAREER OBJECTIVE

- Detail-oriented computer science student specializing in cybersecurity, eager to join a forward-thinking organization.
- Aiming to leverage my advanced cybersecurity, full-stack development, and machine learning expertise to build intelligent security solutions, identify vulnerabilities, and mitigate evolving threats.
- Committed to contributing to high-stakes security projects and further developing my abilities in real-world applications.

PROJECTS

Final Year Project (FYP): An Automated Penetration Testing Assistant: PenetraXploreAI

Tech Stack: Python, Flask, HTML, CSS, JavaScript, LLM, Nmap, Dirsearch, BeautifulSoup4, Selenium, Paramiko, HTTPX, SQLite.

- Alex, our AI assistant, provides interactive chat, running locally without internet.
- Users engage Alex for queries, receiving instant responses from the local AI model.
- Alex initiates comprehensive penetration tests upon user request, automating scans.
- After pentest, Alex generates detailed technical and compliance reports automatically.
- The system centrally manages all user data, scan results, and audit logs securely.

Secure File Vault System

Tech Stack: Python, Flask, HTML, CSS, JavaScript, SQL Server

- Developed a secure file management web app with role-based access control.
- Implemented AES encryption/decryption for all file uploads and downloads.
- Integrated Google OAuth authentication for secure sign-in.
- Created an admin dashboard with activity logs based on Malaysia Time (MYT).
- Enabled group-based file sharing with user-specific permissions.

URL Malware Detection System

Tech Stack: Python, Django, Typescript, LLM

- Built a system to detect malicious URLs using pattern analysis and ML models.
- Designed a Django interface for real-time URL scanning and threat reporting.
- Focused on preventing phishing and malware attacks through automated checks.

Inventory System with L1 Blockchain Technology

Tech Stack: Python, Django, HTML, CSS

- Created an inventory management system integrated with blockchain for data integrity.
- Logged all transactions immutably to prevent tampering or fraud.
- Provided transparent and auditable inventory tracking for businesses.

CVScreenify – AI Resume Screener

Tech Stack: Python, Flask, NLP, LLM

- Built an AI-powered resume screening tool for recruiters.
- Used NLP to extract and analyze candidate data from resumes.
- Automated scoring and ranking based on skills, experience, and education.

Pentesting & Ethical Hacking Projects

Tools: Kali Linux, Aircrack-ng, SQLMap, Hydra, Burp Suite, Nmap, Wireshark

- Performed authorized penetration tests in controlled environments.
- Conducted Evil Twin, brute force, and SQL injection attacks on test systems.
- Exploited and analyzed vulnerabilities on VulnHub VMs (e.g., "Death Note").
- Developed custom HTTP flood simulation script for DoS testing.

AWS Scalable Architecture Deployment

Tech Stack: AWS EC2, S3, DynamoDB, Load Balancer, IAM, Flask

- Deployed a Flask web app on AWS using a scalable 3-tier architecture.
- Configured EC2 Auto Scaling Groups and Application Load Balancers.
- Integrated S3 for static file hosting and DynamoDB for dynamic data storage.

IoT Smart System Prototype

Platform: TinkerCAD

- Designed an IoT prototype simulating automation and monitoring.
- Programmed sensors and controllers to respond to real-time events.

WORK EXPERIENCES

Internship

Venovox

September 2024 - December 2024

- Conducted data analysis and created reports to support business decision-making.
- Managed team-based projects to ensure timely and high-quality outcomes.
- Utilized advanced technical skills to support software development and IT operations.

Freelancer

GLI Truck Dispatch Services

April 2024 – December 2024

WFH

- Specialized in truck dispatching, ensuring efficient route planning and timely deliveries.
- Enhanced company websites through meticulous editing.
- Maintained comprehensive documentation to support smooth operations and compliance.

Telesurveyor

Ipsos

September 2023 – November 2023

WFH

- Conducted surveys over the phone with customers.
 - Collected and recorded survey responses accurately.
 - Ensured a high level of customer engagement and satisfaction.
- Managed and organized data for analysis.

EDUCATION

Bachelor's Degree in Computer Science (Cybersecurity)

Asia Pacific University

November 2022 – October 2025

Bukit Jalil, Kuala Lumpur

Foundation in Computing and Technology

Asia Pacific University

November 2021 – November 2022

Bukit Jalil, Kuala Lumpur

TECHNICAL SKILLS

-
- Word, Excel, PowerPoint, MySQL, Linux, Python, C, C++, C#, Java, Assembly, HTML, CSS, JavaScript, Typescript, PHP, Flask, Jinja2,

SOFT SKILLS

-
- Leadership, Time Management, Problem-Solving, Teamwork, Communication, Critical Thinking, Creativity, Conflict Resolution, Stress Management

CERTIFICATES

-
- **Penetration Testing Professional Certificate** *Cybrary, August 2024*
 - **Offensive Penetration Testing** *LinkedIn, August 2024*
 - **Google Ads Certification** *Google, April 2022 (Renewed August 2024)*
 - **Elite Live SOC Module** *Techforte, July 2024*

LANGUAGES

English (Native), Tamil (Native), Malay (Fluent)

ADDITIONAL INFORMATION

Marital Status: Single
Willing to Relocate: Yes
Own Transport: Yes
Willing to Travel: Yes
