SUMMARY

Secure Full-Stack Freelance Developer with a Computer Science degree majoring in Cybersecurity. Experienced in building digital wellness platforms, secure dashboards, and risk-related analysis models using Python, SQL, Power BI, and machine learning. Driven to apply data science and analytical problem-solving to support financial sector decision-making and risk assessment.

WORK EXPERIENCE

XPLOITDEVMATRIX TECHNOLOGIES

Aug. 2025 – Present

Startup (Founder)

WFH

- Architect and deliver bespoke enterprise software solutions, including custom **web**, **mobile**, and **desktop applications** tailored to complex business requirements.
- Develop AI-powered automation workflows, **intelligent chatbots**, and **process automation tools** that streamline operations and increase organizational efficiency.
- Design and implement interactive **data dashboards** and risk-related analysis models to provide clear business intelligence and reporting.
- Manage the full **software development lifecycle (SDLC)**, from initial technical strategy and scoping to deployment and system maintenance.
- Translate **complex client requirements** into scalable, secure digital infrastructure, ensuring robust code quality and integration.

VENOVOX SDN. BHD.

Sept. 2024 – Dec. 2024

Internship

Damansara

- Conducted data analysis and created reports to support business decision-making.
- Managed team-based projects to ensure timely and high-quality outcomes.
- Utilized advanced technical skills to support software development and IT operations.

GLI TRUCK DISPATCH SERVICES

Apr. 2024 – Dec. 2024

Freelancer

WFH

- Conducted data analysis and created reports to support business decision-making.
- Managed team-based projects to ensure timely and high-quality outcomes.
- Utilized advanced technical skills to support software development and IT operations.

EDUCATION

Asia Pacific University

Oct. 2022 – Feb. 2026

Bachelor of Computer Science (Cyber Security), CGPA 3.46

Kuala Lumpur, W.P Kuala Lumpur

Asia Pacific University

Jul. 2021 – May. 2022

Foundation (Computing & Technology), CGPA 3.71

Kuala Lumpur, W.P Kuala Lumpur

PROJECTS

Final Year Project (FYP): An Automated Penetration Testing Assistant: PenetraXploreAI

Tech Stack: Python, Flask, HTML, CSS, JavaScript, LLM, Nmap, Dirsearch, BeautifulSoup4, Selenium, Paramiko, HTTPX, SQLite.

- Alex, our AI assistant, provides interactive chat, running locally without internet.
- Users engage Alex for queries, receiving instant responses from the local AI model.
- Alex initiates comprehensive penetration tests upon user request, automating scans.
- After pentest, Alex generates detailed technical and compliance reports automatically.
- The system centrally manages all user data, scan results, and audit logs securely.

CVScreenify – AI Resume Screener – Personal Project

Tech Stack: Python, Flask, NLP, LLM

- Built an AI-powered resume screening tool for recruiters.
- Used NLP to extract and analyze candidate data from resumes.
- Automated scoring and ranking based on skills, experience, and education.

AWS Scalable Architecture Deployment – Personal Project

Tech Stack: AWS EC2, S3, DynamoDB, Load Balancer, IAM, Flask

- Deployed a Flask web app on AWS using a scalable 3-tier architecture.
- Configured EC2 Auto Scaling Groups and Application Load Balancers.
- Integrated S3 for static file hosting and DynamoDB for dynamic data storage.

Secure File Vault System – Personal Project

Tech Stack: Python, Flask, HTML, CSS, JavaScript, SQL Server

- Developed a secure file management web app with role-based access control.
- Implemented AES encryption/decryption for all file uploads and downloads.
- Integrated Google OAuth authentication for secure sign-in.
- Created an admin dashboard with activity logs based on Malaysia Time (MYT).
- Enabled group-based file sharing with user-specific permissions.

Facial Health Scanner – Personal Project

Tech Stack: Dart

- Built a mobile-first health utility app in Dart for quick facial indicator assessment.
- Focused on simple UX flow for scan capture, analysis, and readable feedback.
- Structured for iterative feature expansion and model integration.

Makeup Transfer App – Personal Project

Tech Stack: C++

- Implemented a C++ image-processing project exploring makeup transfer transformations.
- Experiments with visual feature mapping and appearance transfer logic.
- Demonstrates low-level programming, performance awareness, and CV fundamentals.

RELEVANT SKILLS

Programming Languages | Python, SQL, R, TypeScript

Data Analytics & Business Intelligence | Data Analytics, Data Science, Business Intelligence, KPI Reporting, Stakeholder Reporting, Data Visualization, Power BI, Excel, Dashboards

Data Engineering & Management | ETL Pipelines, Data Cleaning, Data Validation, Data Management, Apache Airflow

Machine Learning & Statistical Modeling | Regression, Classification, Predictive Modeling, Forecasting, Time Series, XGBoost, Model Evaluation, RMSE, MAE, MAPE, F1

Risk & Financial Analytics | Risk Analytics, Financial Analytics, Customer Segmentation, Cohort Analysis, Churn, CLV

Backend & API Development | FastAPI, REST APIs

Database & Data Systems | PostgreSQL, Supabase, Firebase, Database Management

AI & ML Frameworks | PyTorch, TensorFlow, Keras, OpenCV, YOLO

Cloud & DevOps | AWS, Azure, Docker, Git, GitHub Actions, CUDA
